

Intelligent Roadside Unit

Last Updated: Aug 22, 2022

The marriage of sensing, analysis, control and communications offers great promise for Smart Cities through Intelligent Transportation Systems (ITS). Leading cities worldwide will employ Intelligent Roadside Units (RSUs) to help smooth traffic flow, improve safety and emergency response, and provide additional services. As the market leader in automotive sensors, V2X communication modules, processors for driver assist systems and for communication equipment, NXP is uniquely positioned to deliver solutions for RSUs and other intelligent transportation systems equipment. NXP's Intelligent RSU uses the QorIQ LS2084 to process radar, vision, analysis, and communication technologies.
